

## **How to Layer Bulbs in a Container**

- 1. Fill the base of the pot with compost and plant a layer of daffodils on top. Cover with a little compost.**
- 2. Next plant a layer of tulips spreading the bulbs out generously across the surface and cover with more compost.**
- 3. Place some winter pansies carefully onto compost and fill in space with compost.**
- 4. Finally, push some crocus bulbs into compost, making sure they are covered and then water in.**
